Poinsettia

Brighten your holidays and beyond with these stunning beauties!

Sunlight

Give these plants 6 or more hours of bright indirect sunlight each day.

Water

Water thoroughly when the top inch or two of soil feels dry. Ensure the pot has drainage holes and dump any excess water from saucers to prevent root rot.

Hardiness

Poinsettias are perennials, but not hardy to our climate, and can be damaged by temperatures under 50F. Keep away from cold drafts and heaters. Ideal temperature ranges from 65-70F during the day and 60-65F at night for optimal blooming.
